- »» Horizontal or vertical DIN-rail mounting

Power to the system

Use the PSU-60-24 to provide a stable 24VDC output to power your modules, outstations and devices. It is possible to mount the power supply on a DIN-rail, or straight to your cabinet. The protective cap over the 85~370V connectors ensures a safe handling inside the cabinet. For bigger projects, several power supplies can be combined.

Technical features

Size: 99 x 129mm (x 37mm height)
Operating voltage: 85~264 VAC or 125~373 VDC
Output: 22~27.6 VDC, maximum 3.2A, 76.8 W
Weight: 411 gr
